Equity Research and Investment Banking (ECM, DCM)
Uzbekistan

Summary

I am one of the few analysts actively covering the Uzbek capital market and I am currently covering eight companies on a regular basis by issuing equity research reports. I am also involved in ECM and DCM transactions in the Uzbek capital market.

I moved to equity research and investment banking from being an economic analyst at the Toshkent Republican Stock Exchange, by transferring my capital markets expertise.

I also share my knowledge of finance and analytics at Coursera, having created 15 guided projects that have attracted over 20.000 learners.

I also have been a Wikimedia volunteer for four years, having led projects with over 30 people in my team and attracted over 100 new volunteers.

My academic background includes completed ACCA Diploma in Accounting and Business and undergraduate studies at a business school in Munich, Germany for two years.

Experience

Freedom Finance Uzbekistan
Investment Analyst
February 2020 - Present (7 months)
Tashkent, Uzbekistan

- Sell-side generalist equity research coverage of the Uzbek capital market
- Investment banking focused on equity and debt capital markets
